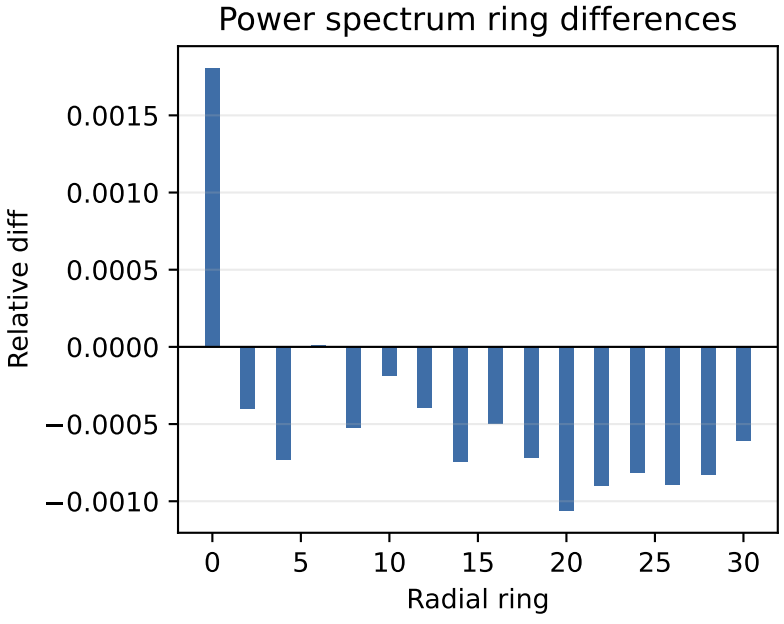
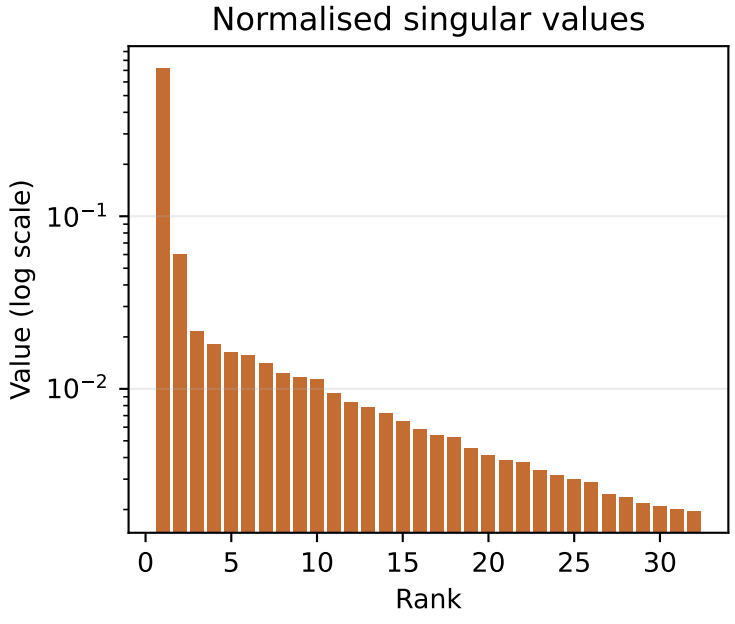
Security/statistical analysis from outputs_v5_analysis/security_analysis.json





```
Supporting v5 security summary

KL(stego||clean): 0.4169
Power-spectrum p: 1.07e-122
Detectable at p<0.05: Yes
SVD gini: 0.8200
Bootstrap BER: 0.0764
Bootstrap PSNR: 34.56 dB
Bootstrap LPIPS: 0.0211

Interpretation:
Low KL does not guarantee spectral concealment.
This v5 checkpoint remains statistically detectable
in the power-spectrum test despite modest
Inception-feature divergence.
